CREATING AN EXPERIENCE
STARTS WITH THE MENU

THERMO-KOOL KNOWS HOTELS/RESORTS

A HIGH-END EXPERIENCE CALLS FOR HIGH-END EQUIPMENT

Hotels and resorts strive to create memorable experiences for guests, whether through large events or personal getaways. Food is key to these experiences, requiring careful inventory management, freshness, and waste reduction. That's where Thermo-Kool comes in!

PRODUCE SHELF LIFE

Fruit plays a key role in elevating your guests' tropical experience. Whether as a dessert topping, a plate garnish, or a cocktail ingredient, the demand for fruit is always high. However, its short shelf life makes it challenging to buy in bulk, leaving you with limited supply and at risk of running out.

So, how can you preserve freshness for longer?

BLUEZONE

BlueZone's revolutionary ultraviolet-enhanced oxidation technology kills or converts chemical and biological impurities, like ethylene gas and the mold causing bacteria, botrytis, so that the air circulating through BlueZone comes out clean and fresh, which helps your produce last twice as long.

LARGE EVENTS

Hotels and resorts host a wide range of events. From weddings and conferences to concerts, your establishment can serve thousands of guests in a single day. This requires preparing and cooking a significant amount of food, but having enough staff on hand isn't always possible.

So, how do you serve everyone when you're short on staff?

INTEGRATED BLAST CHILLERS

An integrated blast chiller is a simple and effective way to enhance the value of your existing or new walk-in cooler or freezer. In addition to promoting food safety and extending shelf life, blast chillers are essential for batch cooking. They allow meals to be prepared up to 90% the day before, then chilled for retherming and finishing on the day of service. This reduces last-minute rushes and minimizes labor demands.

FRESH SEAFOOD

For most resorts, seafood is a must-have on the menu. Being close to the water often gives guests a craving for fresh seafood. Due to seafood's delicate nature, it's essential to keep it chilled from the moment it comes off the boat until it enters the kitchen. To achieve this, you'll need reliable cold storage.

So, what's the most reliable cold storage solution?

WALK-IN COOLER

Thermo-Kool walk-in coolers are custom-made to fit any size, shape, or angle you need. Built with high-density urethane panel perimeters, our walk-ins maintain a superior seal to ensure constant and consistent temperatures you can rely on. Our advanced temperature control system monitors your walk-in's temperature and alerts you if any issues arise, ensuring your products stay safe with Thermo-Kool.

BEVERAGES

The life of any hotel or resort party is the bar. Whether it's a seaside hut or a rooftop lounge, guests savor the crisp flavor of their favorite ale or the fruity tang of a cocktail. Regardless of their beverage of choice, everyone agrees that the most important part of any alcoholic drink is its temperature.

So, what's the best way to keep your beer perfectly chilled from keg to glass?

BEER COOLER

With 65 years of expertise in high-end customization, Thermo-Kool specializes in unique cut-outs designed to accommodate glass windows, doors, or beer tap systems. Paired with our superior seal for consistent temperature control, Thermo-Kool walk-in coolers are the perfect addition to any oceanfront or skyscraper bar.

CUSTOMIZED REFRIGERATION & FREEZER SOLUTIONS

Commercial Walk-Ins

Integrated Blast Chillers & Shock Freezers

Service is often described as a function provided to a guest. Hospitality, on the other hand, is how you make a guest feel by conducting that service. For hotel & resort operators looking to make a great impression with food and beverage, it helps to know when those ingredients are stored in durable and reliable refrigerators and freezers, and that's what Thermo-Kool provides.

CHALLENGES/TRENDS

Successful hospitality results from a team of staff dedicated to solving a wide range of challenges. In today's hotel environment, this means being aware of fast-changing trends driven by guest demands and the global changes we've experienced in the hospitality sector.

- Staffing and labor shortages
- Safety and sanitation
- Food waste
- Guest demands
- Tightening budgets
- Aging equipment

BLAST CHILLERS & SHOCK FREEZERS

Benefits for Hotels and Resorts

GO BEYOND CONVENTIONAL

Blast Chillers and Shock Freezers are revolutionizing hospitality foodservice by reducing food waste, maximizing labor, and achieving temperature goals faster than traditional refrigeration systems. They also seal in flavors and aromas, preventing moisture loss and retaining desirable food textures. Blast Chillers and Shock Freezers go beyond the conventional and change how hotel food directors serve their guests.

PRESERVATION MADE EASY

Refrigeration controls can be cumbersome and hard to operate. In a foodservice landscape of labor challenges, it's important to make processes as easy as possible for staff, and that's exactly what Thermo-Kool's new state-of-the-art controllers will do. Manage your cold food storage at the press of a button.

BlueZone by Middleby

Extending Produce Shelf Life

ADVANCED AIR PURIFICATION

BlueZone® technology transforms your walk-in by eliminating airborne contaminants, including bacteria, mold, and ethylene gas, to extend food freshness and improve air quality. Unlike traditional air purification methods, BlueZone actively removes harmful particles without using chemicals or filters that need frequent replacement. By integrating this cutting-edge solution, Thermo-Kool walk-ins help reduce food waste, enhance food safety, and create a cleaner storage environment—ensuring your ingredients stay fresher, longer.

TAKE THE TWO-WEEK CHALLENGE

See the difference just two weeks with BlueZone® can make! By eliminating ethylene gas, mold, and bacteria, BlueZone helps fruits and vegetables stay fresher, longer, reducing waste and preserving quality. For hotels and resorts, this means the ability to stock fresh ingredients in bulk without worrying about spoilage, cutting costs while ensuring guests enjoy consistently fresh, high-quality dining experiences. Try it and experience the impact firsthand!

DESIGN. CREATE. VISUALIZE.

Ensure your walk-in is the perfect fit for your commercial kitchen! With the power of augmented reality, Thermo-Kool's 3D Configurator lets you visualize your walk-in cooler or freezer directly in your space—before it's even built. See your design come to life and perfect every detail.
